BARCELONA BUYS 50 TON MILL  
R. M. HAMPTON IN CHARGE MINE

Robert M. Hampton has been appointed superintendent of the Spanish Belt mine at Barcelona and will assume charge next week. This is the information conveyed to S. F. Hunt, acting superintendent and geologist of the company, by a telegram received this morning from Julius V. Barnard dated at Marion, O. The place has been vacant since the death of D. R. Walker, which occurred January 11th.

The new superintendent has been in charge of the marble quarries at Carrara, owned by the same interests that control the Spanish Belt. He is a practical miner and one who has had considerable experience in Nye county mines. Mr. Hampton is a man of education and ability and President Barnard believes he is the right man for the place, capable of getting out the tonnage when it is decided to begin shipping. The company is well financed as a private corporation and the management contemplates eventually erecting a mill of large capacity to treat the ores.

Before adopting any suggestions for mill construction the company

will secure the opinions of the most eminent metallurgists, which coupled with the observations and recommendations of Mr. S. F. Hunt, will control future operations. Mr. Hunt has been granted three months leave of absence which he will spend at leading reduction plants on the coast studying various metallurgical problems involved in the treatment of the Barcelona sulphide ores. Next spring after the weather settles Superintendent Hampton will reopen the old Barcelona shaft where values as high as \$600 were found last year when some work was done. Determination of the process as applied to concentration and flotation are minor features as the company has already contracted for a 50-ton plant to be delivered as soon as spring opens and the company has opportunity to build a mile of wagon road which will enable delivery right at the mine without second handling.

OBJECT TO YANKEE  
TROOPS IN AFRICA

(By Associated Press)  
WASHINGTON, Jan. 31.—Senate Republicans today attacked the plans of dealing with Germany's colonies in the occupied territories of Turkey as proposed by Wilson and accepted in principle by the supreme council. Senator Lodge said the proposal of the committee for United States cooperation in maintaining order in the occupied territories was "absolutely unbelievable."

Senator Knox said the matter involved a "stupendous and preposterous undertaking."

Senator Johnson of California denounced the method and declared he never would vote for a treaty that provided for sending American troops to Africa and Asia.

Senator Walsh and Lewis, Democrats, expressed doubts regarding accuracy of statements in the dispatches and Lewis declared it violated the fundamental principle of self-determination.

administration of the colonies formerly owned by Germany was Australia, the Paris edition of the Mail says. The Australian delegates were declared to regard the ownership of New Guinea as vital to the existence of Australia. Clemenceau promised Australia his full support in safeguarding her position, the newspaper adds. There is no possibility now of Australia continuing an independent position, according to the Mail. The attitude resulted in a decision that a mandatory system of administration apply only to non-European territories leaving open for independent consideration the fate of the Adriatic coast, Balkan and Austrian lands and French territorial claims against Germany, the newspaper adds.

The committee has proscribed a limited amount of work for industries, particularly those involved in feeding and warming the people, otherwise there is no industrial activity.

The strike situation was discussed at a special meeting of the cabinet yesterday. The board of trade also is actively endeavoring to bring about a settlement.

The government regards govern-

mental interference now as unwise and perhaps dangerous. Apparently it is generally believed that the absence of strike pay for the men soon will accomplish a collapse of the movement.

The boy is of Finnish parents and for a year or more has given the police considerable trouble through his facility for getting mixed up in other people's affairs and abstracting property that did not belong to him. This is the lad whom Chief of Police Jack Grant has had under surveillance for some time with the object of tracing and recovering stolen property. Much of the plunder has been returned to the owners while the boy says he will pay back every cent he stole.
